

TRANSITION TO SaaS

Challenge:

ISV has existing applications that generate declining revenue streams because of market pressure to choose SaaS approach is increasing every day, but new SaaS version development will require several years to achieve.

Solution:

Atea Global Services Cloud Packaging service ensures your existing application is moved to cloud and can be sold and provided as a service. We can help you with:

- LIFT AND SHIFT
- RE-PLATFORM
- DESKTOP APPLICATION VIRTUALIZATION

Our added value:

- Infrastructure design
- Infrastructure optimization
- Capacity, availability and continuity plan implementation
- Ability to SaaSify both desktop and web based applications

To achieve that we utilize:

- Azure solution architects team
- Virtual client operations team
- Set of best practices in re-platforming
- Our 10 year experience in designing large and complex IT environments
- ITIL processes supported by ISO 20 000, ISO 27 001 and ISO 9001 certification

Our differentiators:

- Focus on ISVs
- Focus on application instead of infrastructure
- Highest ISTM certification level
- Optional end-to-end managed and professional services available
