

A TEA Azure Expert Center

4. Automated scaling and monitoring

2. Multi-tenancy

6. Pure SaaS

5. Self-service subscription based billing and commerce platform with API

3. Automated Customer Provisioning

1. Single Tenant application in cloud infrastructure

A t e a C l o u d P a c k a g i n g

We...

1. **Move Applications to Cloud** - ensuring application can be run cost efficiently on as-native-as-possible Cloud PaaS, IaaS or mix of both.
2. **Enable multi-tenancy** by ensuring new application instances can run side by side utilizing same cloud environment and share valuable resources.
3. **Develop automated customer provisioning** by creating automated scripts and templates that are orchestrated via backend automation engine and supported with tenant specific configuration settings database.
4. **Implement monitoring and scaling** by near real-time application performance and health measurements and auto-scaling depending on real life demand.
5. **Enable Self-service** by providing multi-tenant white-labelled platform to market, sell, provision, monitor and invoice application instances for new customers.
6. **Help you** – on finding the right redevelopment strategy for application to become pure SaaS.

ATEA AZURE EXPERT CENTER

We serve as Single-Point-of-Contact (SPOC) for all your Microsoft Azure needs. We know Azure and cover all 50+ Azure services with our 25+ Azure experts. We have more than 7 years of experience working with Azure. We help our customers moving their applications to the cloud. We have DevOps expertise and cover both on premise, hybrid and public cloud. See more on <http://rethink.atea.com>.
