

Atea AppUpdate

The World's most efficient application package subscription service

Tired of not having your applications up-to-date or wasting your time to do so?

Atea AppUpdate is a unique service, where Atea takes care of the tedious job of maintaining the most commonly used applications for you.

Most companies use the same base applications. Atea has identified more than 100 most commonly used applications, which are typically released in new versions - with security updates or service packs - several times a year. The list includes applications like Adobe Reader, Adobe Flash, iTunes, Google products, VLC and many more. Whether applications are a part of the company image, or deployed using a software distribution system such as Microsoft SCCM or Altiris, the daunting job of keeping them updated in a timely fashion is the same.

The Atea AppUpdate service saves you time and money on maintaining commonly used applications. All packages are fully documented and ready to be deployed.

- Monitoring of new versions
- Delivered within a maximum of 3 days
- Fully documented
- Precise deployment guides included
- Automatic notification
- MSI or App-V format

Save Time

Reduce Costs

Stay Secure

Always updated packages

What does AppUpdate do for you?

Feature	Benefit
Access to 100+ packages ready for deployment	No need for doing packaging yourself - you save time and money
Updated package max. 3 days after vendor release	Higher security – due to more frequently updated applications
Complete documentation and deployment guide	No guessing, when importing packages into your deployment solution

Application Package List

7-zip (x64)	FileZilla Client(App-V 5.0)	Microsoft Lync 2010 (App-V 4.6) (64-bit)	Mozilla Firefox (MUI)(App-V 5.0)	UltraEdit DE
