

ARCHITECTING APPLICATION INFRASTRUCTURE

Challenge:

To correctly choose from more than 70 Azure PaaS and IaaS features and make an informed, cost efficient and scalable Azure application backend infrastructure ISV has to spend a lot of time investigating and testing each feature and component.

Solution:

Atea Global Services Azure Expert team of highly skilled cloud solutions architects that specializes in Azure technology are ready to help in this journey.

Our added value:

- Pool of certified Azure experts
- Well documented environment architecture
- Numerous Pre-configured Azure technology POC setups with "hands-on" experience
- Implementations guided by ITIL recommendations

To achieve that we utilize:

- Azure solution architects team
- Azure solution development team
- Our 10 year experience in designing large and complex IT environments
- ITIL processes supported by ISO 20 000, ISO 27 001 and ISO 9001 certification

Our differentiators:

- Focus on ISVs
- Focus on application instead of infrastructure
- Optional end-to-end managed and professional services available
- 8 years of experience in building Azure based applications and environments
- Highest ITSM certification level
