Managed discovery & UAT phases

Incident management of problems & SLAs

"Pay as you go" financial model

Completely Automated discovery

Full SCCM 2012 & CB integration

Access to packaging factory

3rd party deployment system

ATEA

What does Application Manager Online do for you?

Feature	Benefit
Easy to use Definitive Media Library (DML) hosted in cloud	Secure, fast and ready to use within minutes.
"Serverless" architecture	Dedicated Windows, SQL, file storage servers can be switched off in your server room. Removing associated costs.
Automated management of the Discovery and UAT phases	Lower the cost and time spent per package
SCCM and other deployment systems integration – automated creation of packages, collections and task sequences	Seamless and GUI-driven integration reduces the risk of manual errors
Integrates to most popular repackaging solutions	Faster time from order to delivery plus added flexibility
Azure AD / Office365 / ADFS / LDAP authentication support	Solution integrates with your Azure AD / Office365 / ADFS / LDAP to secure user authentication. End users access solution with own AD accounts.
Continuous and seamless solution upgrade	Solution new versions are release with zero downtime and absolutely seamlessly for end-user.
Issue management for tracking problems and SLAs	You are in control of the complete packaging and deployment process of your applications/packages

New & Discovery

The first phase in the application management process. Enter the package details, contact information like application owner, dependencies and schedule for the discovery of the application. Use Atea AppDisco Online for fully automated application documentation – how to install and configure.

Packaging

Everything – media files, documentation and notes is collected in one place.

Send it to internal packagers or utilize Atea's world class packaging factory and receive status and incidents right inside Atea Application Manager Online.

Deployment

Receive the finished packages right inside Atea Application Manager Online – complete with fully automated documentation through Atea AppDoc Online. Import the package into your deployment system.

User Acceptance Test

Assign your application owner/expert for the important User Acceptance Test. Minimize the time spent by recording the User Acceptance Test with Atea AppDisco Online.

Complete

When finished, deploy your packages directly from inside Atea Application Manager to SCCM 2012, CB or any other deployment system. Use our extensive template based solution for correct and automated creation of collections, task sequences and user & computer AD-groups. The templates are fully configurable to your specific needs and setup.
