Custom-made

Ateas premier packaging service, where you as a customer tell us how an application package is to be customized. Each application package is made ready to order with all your needed customizations included and the only thing left for you is to distribute the application package to your end-users.

Furthermore Atea offers attractive maintenance programs for all your application packages. You do not need to worry about regular updates of your application packages, everything will be taken care of by Ateas professional application packaging factory.

AppUpdate

Atea AppUpdate is a unique service, where Atea takes care of the tedious job of maintaining the most commonly used applications for you.

Atea has identified more than 100 most commonly used applications, which typically are released in new versions, with security updates or service packs, several times a year. This list includes applications like Adobe Reader, Adobe Flash, iTunes, Google products, VLC and many more.

The Atea AppUpdate service saves you time and money on maintaining commonly used applications. You pay a yearly subscription fee and use as many application packages as you need.

Application Manager Online

Atea Application Manager Online acts as a DML by organizing all software in a single location, including original files, installation and packaged media information. It allows System Center Configuration Manager 2012, current branch and all other deployment systems integration. Application Manager Online enables you to manage application entire lifecycle. All the way from Ordering, Discovery, User Acceptance Testing and Documentation processes, right through successful automatic deployment of the applications to your end users.
