

Atea PassOn

The World's most innovative cloud based password reset solution

Imagine you are on a business trip and having problems reaching your service desk to reset your company account password. Meanwhile, your customers are waiting for your fabulous presentation! Such moments can easily damage your company's reputation...

Is there any easier and faster solution? Yes, we definitely have one – PassOn. Atea has built a faster and simpler alternative service desk for your mobile phone and we call it "PassOn". PassOn is a mobile phone application capable of solving issues with your corporate account immediately with a simple tap on your device!

- Service Desk Cost Savings
- Fast User Provisioning
- Reduce Downtime for Users
- Fully Automated
- No Need for Secret Questions
- No Complex Onboarding

- Unlock your Windows User Account 
- Change your Windows User Password 

- Set Temporary Password 
- Works on all major mobile platforms 

What does Atea PassOn do for you?

Feature	Benefit
Unlock your Windows user account	Service Desk cost savings
Set a temporary password	Fast user provisioning
Change your Windows user password	Reducing downtime because of locked out accounts
Manage your own company subscription	The quickest way of solving any password related issues
	Full automation of password handling
	User account can be unlocked when laptop is not accessible or locked out

How it works

PassOn works like a charm. Once you have the need to reset, or change your password you simply hit a button. Your device will then tell our Azure based system that there is a user out there that wants to use the service. We double check that the user has a registered device and also to what tenant that user belongs.

Your on premise service calls our Azure service and asks for password service requests. If everything is correct, we send a text message to the phone containing a pin code. This is just to verify that the device really belongs to the requesting user.

Once the pin code has been verified, the on premise service is allowed to make the operation and the password is changed.

All in less than 30 seconds!!!

ATEA
