Automate device provisioning and enable user self-service

- 40+ application with updates and maintenance
- Up to date Windows 10 and Office 365
- Self-Service portal for applications
- Anti-malware policies
- Up to 5 devices per user
- Automatic computer enrollment

WHAT IS DAAS ?

DaaS is a client management solution that enables end-users to be productive, independent and manage their workstations without knowing anything about IT.

DAAS WILL ENABLE YOU TO:

- Reduce costs on set-up and maintenance of workstations
- Have a more productive environment for your employees
- Focus on your core business instead of IT

“
Atea Device as a Service has transformed aPak IT infrastructure to a much more end-user friendly environment. The solution is so simple to understand and user, there is almost no support needed anymore. All my users are self-help enabled and their devices are kept highly secure.”

- Erik Rosenberg, IT Manager, aPak

HOW DAAS WORKS, TO ACHIEVE BUSINESS BENEFITS

Reduce dependency on IT department

- End-user interaction with IT is slowing down your business
- 9 out of 10 end-users want to be in control of their workstations
- DaaS makes your end-users independent and able to manage their clients without IT knowledge

Increase security of your environment

- Security of your environment is our top priority
- Be aware of health of your clients 24/7
- DaaS together with EMS and Windows 10 will bring the security of your environment to the next level
