Flexibility & Scalability

80% of Fortune 500 are on the **Microsoft Cloud!**

## WHAT ARE MANAGED AZURE SERVICES ?

Managed Azure Services are Azure Operations that by combining Microsoft Azure and Atea Managed Services gives you **360° care of your infrastructure!** Microsoft and Atea take care of the cumbersome work while providing you with the **flexibility** and **scalability** for your business.

### AZURE OPERATIONS:

- Management and support for resources deployed in Azure;
- Azure VM management until logging into VM;
- Monthly Continuous Service Improvement meetings with the customer to fully utilize the ever changing Azure possibilities.

### AZURE VM OPERATIONS:

- Full scale Server Infrastructure Operations for VMs hosted in Azure;
- Server Lift & Shift to Azure;
- Integration of on-premise environments in hybrid operations.

### AZURE RESOURCE MONITORING & ALERTING:

- Monitoring alerting and alert handling together with incident management for Azure resources;
- Recommendations for performance and cost optimization;
- Scheduled reporting.

## HOW MANAGED AZURE SERVICES GIVES BUSINESS BENEFITS

### Predictable costs:

- Fixed monthly service fees without surprises or hidden costs
- Up to 40% administration saving from eliminating software updates, storage allocation, server backups and restores
- Reduced TCO by 10,25% (according to Forrester Total Economic Impact report)

### Increased security:

- Our top priority is the security of your environment
- Be aware of your clients health 24/7
- Microsoft invests over \$1 billion on security yearly

Microsoft Azure helps improve security and enables compliance!

Atea Azure Expert Center demonstrated excellent professional competence within Microsoft Azure and they understood our market perspective to adjust their suggestion to our needs. Issues were solved consecutively, and we were given specific solution proposals to our challenges.
