

# APPUPDATE

The World's most efficient application package subscription service!

Tired of not having your applications up-to-date or wasting your time doing so? Atea AppUpdate is a unique service, where Atea takes care of the tedious job of maintaining the most commonly used applications for you.

More than **11 years** experience in Application Packaging!

WHY YOU WILL LOVE APPUPDATE!

-  Free up your IT resources
-  Offload expenses
-  Become more productive
-  Increased security

## WHAT IS APPUPDATE?

Atea has identified **more than 100 most commonly used applications**, which are typically released in new versions – with security updates or service packs – several times a year. The Atea AppUpdate service **saves you time and money** on maintaining these applications, all packages are **fully documented and ready to be deployed**. The customer is provided with an **Azure based, enterprise level application portal** called Atea Application Manager Online where the packages are delivered to. The new packages are provided to Application Manager Online **within 72 hours from the new release**.

**Application Manager Online** integrates with SCCM, Intune, O365 and provides the customer with a **centralized platform to store and nurture packages**, manage versions and easily upload new packaging requests for customer specific applications.

**AppUpdate and Application Manager the combination that enables you to:**

- Reduce costs on set-up and packaging of applications;
- Have an updated and productive environment for all your employees;
- Focus on your core business instead of IT.

**APPLICATION MANAGER ONLINE:**

- Application portfolio library;
- Serverless architecture;
- Internal and external packaging;
- Integration with SCCM, Azure AD, 3<sup>rd</sup> party deployment systems;
- "Pay-as-you-go" financial model

## HOW APPUPDATE AND APPLICATION MANAGER ONLINE GIVES BUSINESS BENEFITS

**Make AppUpdate profit you:**

- You do not spend any more valuable time in packaging your standard applications
- Subscription based service at a fixed price for 1, 2 or 3 years
- Access to more than 100 application packages with detailed technical documentation

**Enhance security and efficiency:**

- Security of customer's environment is our top priority
- Don't involve your IT resources in routine tasks, focus on your core business
- Deployment into your environment within a few clicks
