

# ATEA FORESIGHT

With Windows Analytics

The Modern Workplace  
without losing the insight  
into your devices and user  
experiences!

WHY YOU  
WILL LOVE IT!

## WHAT IS ATEA FORESIGHT?

Atea Foresight ensures Windows 10 and Office 365 user experience monitoring through updates and changes in the IT environment.

### STAY ON A SUPPORTED OS:

- Moving from one Windows OS version has never been easier
- Application packaging only where needed
- Using correct Microsoft Update rings for piloting

### LEAVE NO VULNERABILITIES OPEN:

- Always up to date
- Latest antimalware and antivirus definitions
- Industries best practices on security policies

### FIXING THE TRENDS:

- No more crashing computers
- Fix the App issues even if the users do not report them
- No more locked out users

## KEY FEATURES

Why customers use our service

Make your migration to Windows 10 easy and predictable

Be more productive without the need to test every application in the company

Improve your user satisfaction with the organization IT environment

## GET CURRENT, STAY CURRENT:

Windows 10 and Office 365 have **major updates every 6 months**. Ensuring that **all of your users** are using the latest technologies is crucial not only due to **security concerns** but also new features **improve and extend a productive use of devices and applications**.

## STAY PRODUCTIVE THROUGH CHANGE:

**Implementing IT environment changes** that affect how users log in, get applications and stay secure may have an **impact on your users daily life and also your business**. With proactive monitoring and change support you can **ensure that your users stay productive at all times**.
