

# APPLICATION PACKAGING

The World's most professional Application Packaging Factory!

At Atea we have perfected the art of application packaging, allowing for significant cost savings and time reaction for both IT and business operations!

More than **13 years** experience in Application Packaging!

WHY YOU WILL LOVE APPLICATION PACKAGING!

-  Free up your IT resources
-  Offload expenses
-  Become more productive
-  Increased security

## WHAT IS APPLICATION PACKAGING?

Application packaging is one of the **most important software management tasks** IT departments oversee in order to maintain a **stable and productive end user environment**. Desktop applications must work as expected, be configured and updated to the required level and be available **from different platforms** in a consistent and **dependable manner**.
