

ATEA CLOUD GOVERNANCE JOURNEY

CLOUD COMPUTING

As technology is evolving, the demands from our users are rising with it. Cloud computing can be one of the solutions to meet your organizations demands, not to mention the need to be agile in the deliverance of new technologies.

THE CHALLENGE

The most important challenges with adaptation of cloud services cannot be neglected without considerable risks:

- Is it possible to deliver cloud workloads within your organization IT deliverance model?
- Can organizations in the cloud be compliant with laws and regulations?
- How can an organization manage resources in a user-driven environment?
- How to manage the evolution of shadow IT in organizational environments?
- Can cloud be implemented without ending up with an anarchistic IT infrastructure?

CLOUD COMPUTING

Atea has created a journey for governance, to help organization embrace cloud computing in a controlled maner. The journey is built on best practices from Gartner and The Open Group - Atea will help organizations mitigate known cloud challenges. Atea Cloud Governance Journey is built as a journey with 6 phases, which starts of as vendor agnostic and transformes to the organizations platform of choice. The importance of being vendor adnostic is not locking down your organization to a single vendor in a time-age of rapidly evolving technology.

Governance is a process to establish policies for a governed organization. Atea Cloud Governance Journey aims to adapt the policies to create technological guard-rails within the cloud environment to minimize management processes with implementation of automation.

Atea cloud Governance will ensure compliance, security and control of resources for your cloud initiative.

ATEA CLOUD GOVERNANCE JOURNEY

CLOUD COMPUTING

Atea offers a governance journey that covers 6 phases, so organizations can be agile in a controlled maner.

ESTABLISH GOVERNANCE PROCESS
PHASE 1

ORGANIZATIONAL REQUIREMENTS
PHASE 2

TECHNICAL DESIGN
PHASE 3

IMPLEMENTATION
PHASE 4

DELIVERABLES
PHASE 5

GOVERNANCE GOAL
PHASE 6

The first phase is the phase of review and planning and can be delivered to customers as a two-day workshop for only **19.900,- NOK**

This workshop will review current IT strategy, cloud strategy and create a governance team and communication plan. This will build the basis of the next 5 phases.

** The number and size of the workshops in phases 2 to 6 is determent by the size and complexity of the organization*

***If there is no pre-existing strategy in the organization, Atea can contribute to create one in a seperate workshop*
