

## Ever wondered how secure your Office 365 environment really is?

It is time to stop wondering – the Microsoft Secure Score is here to help.

You can think of Secure Score as a credit score for security. Microsoft Secure Score analyzes your Office 365 and Windows 10 environment, and automatically assigns a score based on your regular activity and security settings.

According to Microsoft, the average secure score across all tenants for Office 365 is 37 out of 707. Do you want to know what your secure score is and how to improve it?

How to get started?

Atea arranges customized workshops to provide visibility, control and guidance in your work to secure your cloud environment.

Deliverables

The first step is the phase of review and planning. This can be delivered to customers as a one- day workshop for only **19.900,- NOK**.

This workshop will review Office 365 protection capabilities, inspect your organization's existing security and provide improvements of the Office 365 environment.

\*The number and format of the workshops in phases 2 to 4 is determined by the size and complexity of your organization.

\*\*If there is no pre-existing Office 365 environment, Atea can contribute to create one.
